

Tri-Rail Coastal Link

Project Description

- New 85-mile commuter rail service from Miami to Jupiter as an integrated extension of Tri-Rail
- Up to 25 stations identified for further evaluation during Project Development phase
- Shared tracks with FEC freight and Brightline Intercity Passenger Service
- Co-located stations with Brightline in Miami, Ft. Lauderdale and West Palm Beach (under construction)
- Phased project implementation likely based on availability of local matching funds
- Project governed by partnership *Memorandum of Understanding* executed in 2013
