Paymentus shall perform in a professional manner all Services required to be performed under this Agreement.

3 Compensation

3.1 No Fee Installation

Paymentus will charge no fees related to the Initial Setup of either or both of the Web and IVR interfaces to its standard service.

3.2.1 Paymentus Service Fee

Paymentus will charge each User or Client a Service fee for each Payment ("Paymentus Service Fee") as provided in Schedule A. If so provided in Schedule A, the Paymentus Service Fee is to be collected in addition to the corresponding Payment as part of the transaction.

For each Payment, the Paymentus Service Fee will be collected and Paymentus will pay the corresponding processing and related fees of the Payment Methods Included ("Transaction Fees") except for fees related to Reversed or Charged-back Transactions.

A schedule of Paymentus Service Fees is attached as Schedule A. The Paymentus Service Fee is based on the Fee Assumptions. Paymentus may amend Schedule A upon prior written notice to Client if a change is caused by changes in the card or payment system rules or changes in credit card fees or if the Fee Assumptions prove to have been materially incorrect. The amended Service Fee shall take effect 30 days after written notice to Client.

4 Payment Processing

4.1 Integration with Client's Billing System

At no charge from Paymentus to Client, Paymentus will develop one (1) file format interface with Client's billing system using Client's existing text file format currently used to post payments to Client's billing system. Client will be responsible to provide Paymentus with the one file format specification and will fully cooperate with Paymentus during the development of the said interface. If Client chooses to create an automated file integration process to download the posting file, due to Paymentus security requirements, Client will use Paymentus specified

integration process. The Paymentus platform is an independent full service fully hosted platform per PCI-DSS requirements for a fully hosted solution. As such, the Paymentus platform does and can function independent of any billing system integration. A payment posting file can be emailed or downloaded from the Paymentus Agent Dashboard. If Client chooses to have the Paymentus platform integrated with its billing system, Paymentus offers two options:

(i) Paymentus standard integration specification that Client can use to integrate its billing systems with Paymentus platform ("Standard Integration"); or

(ii) Paymentus to either customize or configure its platform to integrate with Client using file specification or APIs supported by Client's billing system ("Client Specific Integration").

If Client chooses Standard Integration, Paymentus agrees to fully cooperate with Client and provide its specification to Client. Paymentus also agrees to participate in meetings with Client's software vendor to provide any information or clarifications needed to understand Standard Integration. Paymentus agrees to provide all integration/interface specifications within 30 days from the Effective Date. Client will take commercially reasonable steps to develop the integration within 60 days from the date on which Client has received all integration specifications from Paymentus.

If Client chooses Client Specific Integration, Paymentus agrees to develop that integration at no charge from Paymentus to Client, provided however, Client agrees to fully cooperate with Paymentus and cause its software vendors and other service providers to fully cooperate with Paymentus. Client agrees to provide all specifications required for Client Specific Integration. Client further agrees to participate in testing with Paymentus and if needed, cause its billing software vendors and other service providers to participate in testing. Client agrees to provide or make available all integration/interface specifications within 30 days from the Effective Date. Paymentus will take commercially reasonable steps to develop the integration within 60 days from the date on which Paymentus has received all the integration specifications from Client or its vendors.

Parties agree that if the parties do not cooperate fully, it can lead to each party being unable to perform its duties to deliver the integration in time.

Based on Client's use of the Paymentus platform and its respective modules selected under this Agreement, Paymentus will require the following integration points:

- (i) For one-time Payment Module:
 - a. Customer Information – Text File or Real-time
 - b. Payment Posting – Text File or Real-time
- (ii) For Recurring Payment Module
 - a. Text File
- (iii) For E-billing Module
 - a. Billing Data - Text File or Real-time link to billing data
- (iv) For Outbound Notification
 - a. Audience File – Text File for customer engagement messages

Each of these can be based on Standard Integration or Client Specific Integration.

The Initial Setup for the Web or IVR interface will be considered complete when the first Standard Integration or Client Specific Integration, as applicable, is completed such that Paymentus and Client are able to exchange files relevant to that interface, as contemplated in this Section 4.1. In the event the Services are implemented without integration, the Initial Setup will be considered complete when a User is able to access the Paymentus website or IVR to process a payment.

4.2 Enhancements

The parties agree that the Services are provided on a "platform as a service" basis, and not as a result of custom software development. Paymentus' standard Platform will be personalized to achieve certain additional functional requirements of Client, as clarified and agreed during implementation ("Enhancements"). Enhancements may include some or all of the features included in any technical requirements or similar document provided to Paymentus. The parties will fully co-operate with one another to: a) ensure that requirements with respect to Enhancements are clarified as needed; b) accept Paymentus proposed reasonable alternatives to

achieve Client's functional objectives within the limits of the Paymentus platform; and c) accept Paymentus' reasonable estimates of time for completion, designs and plans with respect to agreed Enhancements. There will be no fee charged by Paymentus to Client for Enhancements, provided Paymentus designs and plans are accepted by Client. If the Services are to be offered at multiple locations, or if the Services include multiple Enhancements, the parties will agree to a phased implementation.

4.3 PCI Compliance

For PCI Compliance, Client has two options for using Paymentus platform:

- (i) Paymentus Fully Hosted Solution; or
- (ii) Any other configuration

To substantially reduce or eliminate any PCI compliance risks and to render all Client systems out of scope from PCI compliance requirements, Client agrees to use Paymentus' fully hosted service where Paymentus uses its own platform to capture Payments and to manage the entire (end to end) user experience from the following channels for Payment acceptance: Web, Mobile, IVR, POS devices operated by Client's employees (per Paymentus recommended setup), recurring payments, Ebill Presentment ("Paymentus Fully Hosted Solution"). If Client chooses any other integration, such as third party web pages integrated with Paymentus APIs, third party gateway pages, or its own IVR systems or other POS or customer self-service solutions, or a cashiering module from a third party, Client expressly agrees that Client shall not be exempt from PCI requirements and shall be liable for any data breaches occurring on its own systems as Client recognizes that Client systems are participating in the transactions and are in scope for PCI compliance. Under those circumstances, Paymentus shall not be responsible for any PCI obligations outside of Paymentus own platform and Paymentus expressly disclaims any PCI or security obligations related to Client systems or any third party systems that participate in the payment transactions that are outside of Paymentus Platform.

Paymentus highly recommends that Client uses Paymentus Fully Hosted Solution to substantially reduce its PCI compliance and data breach risks.

If Client chooses to use any other option other than Paymentus Fully Hosted Solution, Client agrees and warrants that Client shall remain PCI compliant throughout the term of this Agreement. For clarity, just because Client uses PCI compliant applications, such as its billing software, it does not eliminate the need for Client to be PCI compliant. Per PCI requirements, if a party's systems participate in processing, or accepting or storing card transactions, that party is required to be PCI compliant as the systems are in scope.

4.4 Explicit User Confirmation

Paymentus shall confirm the dollar amount of all Payments, and when paid by the User, the corresponding Paymentus Service Fee to be charged to a card and electronically obtain the User's approval of the charges prior to initiating card authorizations transaction. Paymentus will provide User with electronic confirmation of all transactions.

Paymentus will arrange for Client to have a merchant account with the Paymentus Authorized Processor for processing and settlement of the card transactions.

4.6 Card Authorization

For authorization purposes, Paymentus will electronically transmit all card transactions to the appropriate card-processing center, in real time as the transactions occur.

4.7 Settlement

Paymentus together with its authorized card processor shall forward the payment transactions, and when paid by User, the corresponding Paymentus Service Fee to the appropriate card organizations for settlement (other than the Paymentus Service Fee) directly to Client's depository bank account previously designated by Client (hereinafter the "Client Bank Account"). When as provided in Schedule A Client pays the Paymentus Service Fee, Paymentus will invoice Client and debit the fees from Client's account on a monthly basis.

Paymentus together with the Paymentus Authorized Processor will continuously review its settlement and direct debit processes for its simplicity and efficiencies. Client and Paymentus agree to fully co-

operate with each other if Paymentus were to change its settlement and invoicing processes.

4.8 Reversed or Charged-back Transactions

With respect to all Reversed or Charged-back Transactions Client authorizes Paymentus and Paymentus Authorized Processor (and/or the respective card organizations) to debit the Client Bank Account for the Payment Amount and Paymentus shall refund to the card organization for credit back to the User the corresponding Paymentus Service Fee, if any.

Paymentus together with Paymentus Authorized Processor will continuously review its processes for Reversed or Charged-back Transactions for simplicity and efficiencies. Client and Paymentus agree to reasonably co-operate with each other if Paymentus requires any change to its settlement and invoicing processes for these transactions.
