Approximately a year ago the City inquired about a drainage problem at the above noted intersection and what corrective measures could be taken to address the issue: it should be noted that the 14<sup>th</sup> Ave. Drainage Improvement Project did not include this area of HBB as this is a State Road. At the time of the inquiry, the City was informed that FDOT had a drainage project designed to correct the flooding and that the project would start in the May-June 2017 time period. Upon the Commissioner's inquiry to staff, a request was sent to FDOT for a status update on this project and the following response was received from James Poole, P.E., District Drainage Engineer – FDOT District 4:

“The person who was managing this small project is out of the country, but I'm tracking down all the history to give you the latest.

- I'm also seeing where we were coordinating conflicts with (traffic signal?) pull boxes. Perhaps work was being done to correct that ahead of our project; I'll let you know if that's causing a delay.
- The Department still hasn't obtained a couple of the license agreements needed to complete this project. Our R/W people are attempting to reach out to the property owners.
- We're still working on a construction timeline for you.

**C. Vice Mayor Lazarow (Cont.):****C.2. Flooding at intersection of 14<sup>th</sup> Ave. and Hallandale Beach Boulevard (HBB) (Cont.):**

For what it's worth, the project is still identified as a priority project for us – so we haven't abandoned it. Also, according to the language in the license agreements, the work should be completed by this fall. So, it seems we have that deadline, at least."

Based upon the model provided by Vice Mayor Lazarow, residents submit their request to paint the hydrant and the resident provides any necessary materials and labor to complete the project. Staff is currently researching how other communities are dealing with this issue and possible sample ordinances to utilize. Once research is complete DPW staff will work with the Legal Department to submit an ordinance for City Commission approval by the second meeting in November.

**UPDATE:** Based upon staff research, please note the following:

- **Clarification from FDOT:**

“Prior to any work requiring lane closures, mobile operations or traffic pacing operations, the contractor or permittee shall submit a request to the Department that includes the time, location, and description of work being performed. The lane closure request shall be submitted to the Department a minimum of 2 weeks prior to the proposed closure date and must be approved by the Department before work requiring the closure may begin within the FDOT Right of Way. Contractor or permittee must also comply with the lane closure analysis as outlined in the Plans Preparation Manual; Volume 1, Chapter 10.12.7. The request shall be entered into the Lane Closure Information System (LCIS) by the permittee at the following URL address: <https://LCIS.dot.state.fl.us>. Each request will be reviewed by the appropriate Department personnel for compliance with contract or permit requirements and coordination with adjacent projects or work activities.

In normal circumstances (maintenance activities, utility work, construction projects), FDOT does not allow lane closure during peak hours (7:00-9:00 AM or 4:00 –6:00 PM)

Maintenance of Traffic (lane closures on the state road system occurring during peak hours 7:00-9:00 AM or 4:00 –6:00 PM), lasting over 24 hours and/or at limited access facilities must contact Barbara Kelleher two weeks prior closures.

Two lane closures are allowed during the night time.

The City Engineer contacted Public Works directors from several municipalities, one being the City of Aventura, and asked if such restrictions

**F. Former Mayor Cooper (Cont.):****F.3 Utility Construction (Cont.):**

exist within their cities code of ordinances. No one was aware of such restrictions. The City of Aventura explained that a big role in the lane closure is their Police Department. Also, the City of Aventura does not allow lane closure on Thanksgiving and Christmas shopping times (this is an internal process and not in their City Code of Ordinances).

The City Engineer reached out to FDOT/permitting section and asked if they are aware of any municipality restricting lane closures during the daytime. FDOT response was they are not aware of such, and they stated that FDOT would issue permits for a lane closure as per their policies and regulations.

Conducting more research the City Engineer found out the following:

Florida Statute, Chapter 335.15 (6)- State High System includes the following:

“...Whenever any road on the State Highway System is repaired, reconstructed, or otherwise altered in a manner that necessitates the closing of one or more traveling lanes of the road for a period of time exceeding 2 hours, the party performing such work shall give notice to the appropriate local law enforcement agency within whose jurisdiction such road is located prior to commencing work on the project. However, when the closing of one or more lanes is required because of emergency conditions, such notice shall be waived...”

*Staff is proposing the following course of action:*

1. The City Attorney investigate and provide a legal opinion if the City Code of Ordinances – Chapter 25, can be amended to include that Public Works Permit / Right of way permit is required for any work for maintenance activities in the State Highway System that requires lane closure. (In this case each application will be approved by the City of Hallandale Police Department;
2. The City of Hallandale Police Department shall actively follow and enforce “Florida Statute Chapter 335.15 (6)-State High System as necessary.
