

CITY OF HALLANDALE BEACH, FLORIDA

MEMORANDUM
CM18-202

Date: June 29, 2018
To: Mayor and City Commission
From: Roger M. Carlton, City Manager 
Subject: Code Compliance and Building Inquiries Regarding 437 Golden Isles Dr.

Residents of 437 Golden Isles Drive have asked the City to provide information related to construction and code compliance at their condominium building. On April 2, 2018 Donna Rubin hand-delivered 56 pages, consisting mostly of audited financial statements for the Golden Horn Condominium Association, Inc. to the City manager's Office. This was subsequent to a meeting a few days earlier, including several residents, during which Ms. Rubin requested the status of the following :

- 1) Roof permit approval prior to 40-year inspection approval.

Nothing prohibits the issuance of permits for work on a building which has not yet passed its 40-year inspection. In fact, often it is necessary for work to be done in order to be able to pass 40-year recertification, and such work requires a permit.

- 2) Pool renovations started prior to the issuance of a permit

Upon receiving a complaint and verification via an inspection, Code Compliance staff opened Case #17-00507 on May 24, 2017 and placed a hold on the property to alert the Building Division of the violation. A permit application for the work was in process. An "early start" letter was granted on June 7, 2017.

- 3) 120 units were granted permits for hurricane windows and doors.

The status of each permit issued to 437 Golden Isles Dr. is included in Attachment #1.

- 4) Elevator

Elevator complaints fall under the jurisdiction of Broward County.

- 5) 40-year recertification

There is an active, valid permit for concrete restoration (permit #18-409). In order for an engineer to certify that the building has passed its 40-year

recertification, the work associated with this permit must be completed and approved.

On April 10, 2018 TRC Worldwide Engineering, the engineers of record for two permits at 437 Golden Isles at the time – including the concrete restoration the pool renovation -- called the City saying the contractor is not performing the work to the specifications, that condominium association is getting another engineer involved, and that the issues were the contractor's to resolve and not the engineer's. On April 20 the City received a formal letter verifying the change of engineer.

6) Fire Lane Parking

Vehicles are not allowed to park in the Fire Lane as this blocks access for emergency vehicles. As was explained at the meeting, this falls under the jurisdiction of the Fire and/or Police Department. If the issue is not resolved immediately when it occurs, the Police and Fire Departments should be called so that the problem can be addressed appropriately at the time it is occurring.

7) Use of the door entry system

The door entry system is in proper working order. Maintenance of the numbers entered into the system is a matter for the residents to work out with the management and/or condominium board. There is a key box for Police and Fire to gain access in to the building in the event of an emergency.

8) Unaccounted for work

The City is not the proper entity to review the audited statements provided, to comment upon the accusation of "unaccounted for work", or to attempt to combine the accusations with the statements in order to initiate potential construction-related code violations.

9) Potential Code Violations Reported

Code Compliance staff has diligently addressed each specific complaint that has been received at this address. There have been a very disproportionately high number of complaints. Summaries follow:

- a) "No Dumping" signs. Not considered a violation if such signs are purchased and posted by large property owners on their property to help discourage illegal dumping.
- b) Open/unresolved permits – City staff members provide information to owners on a regular basis to help them to resolve expired Building Permit issues which occur often and for myriad reasons. Expired Building Permits often come to light when a person is selling his/her property. The Permit must be reactivated and inspected at that time to finalize the Permit.

- c) Code Staff has not had access to observe the complaint of bathroom renovation work done without a Building Permit in unit # 8 A – Code Staff will follow-up to try to obtain access.
- d) Code Staff has not had access to observe the complaint of removal of wall in dining room, kitchen renovations and replacement of dishwasher in unit # 9I – Code Staff will follow-up to try to obtain access.
- e) Complaint for removal of lights on the building. Code Staff checked photographs going back 10 years and did not find evidence of lights. In January of 2018, Code Staff spoke to the President/Manager of 437 Golden Isles Drive regarding the matter. She stated that she believes that the removal of the lights was included in a 2005 Building Permit for repairs to the front of the building. She stated that they will be doing waterproofing and stucco and will replace the lights then if she gets the as built plans from the City showing they were there originally. These plan will be provided if they can be located.
- f) There is no penalty for false reporting. The Code Compliance Division responds to all complaints. The complaints received are sometimes valid, sometimes invalid and at times cannot be verified. In some instances complaints result from interpersonal conflicts between unit owners or building manages and unit owners.
- g) The City has not allowed any building permits to be issued for any renovations for unit # 3A until the Condominium Association obtains a folio number assigned to the unit via the Broward County Property Appraiser.
- h) An after-the-fact permit for work done in the community kitchen is to be obtained. Code Staff will follow-up on the status of the permit.
- i) In August, 2016, Code Staff received a complaint for a new air-conditioner installed for #9D. Code Staff issued a Courtesy Warning for work without permit. The door of the air-conditioner closet, located in the common area hallway was opened for Code Staff to photograph. Code Staff did not open the door nor enter the air-conditioner closet which appears to be Limited Common Area, access to which is available to management. Code Staff subsequently spoke to the owner, Chaz Volpe, who stated that an application had been completed for a Permit. According the City records, the application was subsequently submitted on September 16, 2016 and received a Final Inspection on September 28, 2016. This topic was talked about at length during the above referenced meeting. It has been determined that staff conducted themselves properly in all aspects. The permit was obtained within a reasonable time without the need for a code violation to be issued.

- j) In June, 2015, Code Staff received a complaint for a new-air conditioner installed at for #6E. Code Staff posted a Courtesy Warning on the door regarding a complaint that an air-conditioner had been installed without a Building Permit. Code Staff did not observe the air-conditioner. An application for an air-conditioner permit was submitted on July 8, 2015 and received an approved Final Inspection on October 30, 2015.

Attachments:

1. December 1, 2017 response regarding the same property
2. Full listing of permits, for which we have computer records, for 437 Golden Isles Drive showing their status. Plans aren't necessarily available for all of these permits listed, digital or hard copy.

C: Keven Klopp, Development Services Director
Shellie Ransom-Jackson, Building Official
Jose Campa, Code Compliance Manager

Subject: Inquiries regarding Golden Horn Condominium

Commissioner,

Below I've organized the comments from the original complaint into categories (**BOLD**), "paraphrased" the question or complaint for each, and put a response in *italics*.

Abuse of code enforcement to harass

"Mrs. Ivanovski has a special or friendly relationship with the Code Compliance Specialist assigned to Golden Horn. Misuse and abuse of code enforcement to harass and damage unit owners continues. City indulges false claims. Perhaps do a unit to unit inspection and check what's permitted/unpermitted."

Staff within the Develop Services Department (Code Compliance Division, Building Division, Planning and Zoning Division) strive to provide consistent, professional, objective assistance to all constituents. Staff attempts to maintain a friendly disposition with everyone, even as the responsibility of enforcing the law is fulfilled. Staff is obligated to respond to complaints. Such response includes investigation to determine if a complaint is valid or false. The Code Compliance Specialist for this area is a very dedicated employee who, regrettably, spends a disproportionate amount of the work week addressing complaints involving Golden Horn due to the internal disputes there. The effort is consistent, professional, and objective, and is conducted in a friendly manner.

Intercom/door bell system

"Resident cut off from the intercom/door bell system. What happens if there is an emergency? Does the FD or City have purview over this matter?"

City Code Chapter 14 requires that any equipment, system, or facility provided at a building – including electrical systems and accessories – be maintained in working order. Development Services is investigating the compliant and will take appropriate action, including involving the Fire Department if and as appropriate.

Expired permits

"Expired permits in the building department. Why have they expired, isn't that a violation? "

There are 40 expired permits at 437 Golden Isles Dr., some dating back as far as 1997. As many as 12 of them are from the last year or two, and the majority of those are for windows and doors. There are many different scenarios that lead to expired permits, not all of them are violations. Often times expired permits are just a matter of record keeping. The City assists unit owners on a case by case basis to research expired permits and to take any appropriate action.

Unit 3A

“There is a history of people residing in Unit 3A – it is a common element. Planning and zoning refused our associations request to allow someone to reside in that space, saying the folio number associated with the space is considered common element and it could not be assigned a unit number.”

It is true that there is a history of individuals residing in a space that is referred to as “the lounge”, “the Manager’s Apartment”, and/or “Unit 3A”. The fact that it has been used as a residence for a many years is part of the problem. There is a history of “the unit” being purchased and sold. While the City has not denied a request to allow someone to reside in the space, it is unclear when and how such arrangement came to be; the City has no official designation of the space as a residential unit at the development. The City has not allowed permit applications for construction work in this unit to proceed until the space is officially assigned a unit number. In order for it to have a unit number it needs to be assigned a proper folio number by the Broward County Property Appraiser so that it, or the common area, can be -- amongst other things -- taxed appropriately. Currently, the folio number to which the space is assigned is the common area that contains the pool but no structure certified as habitable. The City’s position is that the Condominium Association is obligated, as a prerequisite to any next step, to clarify the folio number assignment with Broward County.

Lighting outside the front of the building

“The lighting outside the front of the building has been illegally removed and cemented over leaving no overhead lighting in the front of the building; no permit.”

This is being investigated by Code Compliance. If permanently installed lighting was removed without a permit, a notice of violation will be issued.

Plumbing and building repairs

“Our 2014-2016 annual audits revealed there was 300k or more spent over this period in plumbing and building repairs. A search of the building department system reveals there were no permits pulled for such a significant amount of money. Where are the permits and what was this money spent on. Detective Greico has banking records showing substantial payments to companies like A&I plumbing. Records cannot be obtained through our association management to verify.”

It is my understanding from the City Manager’s Office that an investigation of this matter is already underway. Development Services is not involved in such investigation, but our staff will certainly provide any relevant records as requested and appropriate.

40-year certification

The 40-year recertification is the Association’s responsibility. The Department has consistently prioritized its efforts to compel building owners throughout the City to fulfil the 40-year recertification requirements. The details pertaining to this building are being researched by the Building Division to ensure that our future efforts to compel compliance will continue to be consistently enforced as they are for all other delinquent properties.

Please do not hesitate to contact me if I can be of further assistance.

Subject: Reason for Our Conference Call Today

Good morning,

Sorry for the cancellation of our appointment this morning. I am sending this out now to save you some time so you know what I'd like to discuss. Thank you both for accommodating me.

I am sure you are all familiar with Maggie Ivanovski, and the concern many of the residents at Golden Horn Condominium have. One of the residents met with me several times. This past Wednesday she mentioned to me concern that Mrs. Ivanovski has a special or friendly relationship with Corine from the building department. And that whenever Mrs. Ivanovski calls her, Corine comes out and indulges Maggie's often false claims. I am of course not pointing fingers, I just want this looked into, as I have heard from dozens of residents in this building about similar concerns and activities that go on here.

One complaint that is of concern to me is that the Resident who challenges Mrs. Ivanovski has been cut off from the intercom/door bell system. What happens if there is an emergency to this unit owner, or if the Fire Department needs to gain access. Does the FD or we as a city have purview over this matter?

Additionally, the resident, noted concern over the following (I have copied and pasted from her email to me):

As per our conversation...there are my issues for the building department... * There are a number of expired permits in the building department system for windows and doors. Why have they expired if the work is completed and windows are in...isnt that a violation? * Unit 3A is part of our common elements. We have a long history of having a person residing in that unit illegally. Planning and zoning refused our associations request to allow someone to reside in that space, saying the folio number associated with the space is considered common element and it could not be assigned a unit number. Since that time, our superintendent vacated the premises in June. However there is a new family (Dmitry), who it is said is the super from the Golden Horn south Building. He and his family are now residing there illegally. We want them removed and the association cited for violating AGAIN. * The lighting outside in the front of the building has been illegally removed and cemented over leaving no overhead lighting in the front of the building. This needs to be remedied as there is no permit to remove this lighting, and we want it put back. * Our 2014-2016 annual audits revealed there was 300k or more spent over this period in plumbing and building repairs. A search of the building department system reveals there was no permits pulled for such a significant amount of money. Where are the permits and what was this money spent on. Detective Greico has banking

records showing substantial payments to companies like A&I plumbing. Records cannot be obtained through our association management to verify. * 40 year building inspection...why do we not have it and why has HB not demanded compliance. When we spoke to the building department clerk, she indicated the association received a letter from COHB in 2013, but ignored it...still not compliant. This has cost sales of units for some unit owners. Many complaints have been made to code enforcement, but still no action. There are severe cracks in the stucco causing substantial water intrusion and years of damage to the unit owners in corner units. People were substantially damaged by rain during the hurricane forcing some unit owners to file for FEMA relief/aid. A 40 year building inspection would have forced these repairs be made long ago...The 40 year inspection was due 7 years ago...any other resident in HB would be offered no such considerations. * Misuse and abuse of code enforcement to harass and damage unit owners. There have been many allegations against unit owners here who opt for change. It is our position that if the building department is receiving so many complaints regarding code violations, perhaps they should go unit to unit and check to ensure they have what they were permitted to have...if not the COHB code enforcement should not be used as a vehicle to punish unit owners by our board. There have been many examples (Corine Yoder) unit 9BC, 6J, 8D, 8B...we are tired of being harassed by COHB at the boards request.
