Re: Phase I Environmental Site Assessment
Electric Bus Charging & Fleet Facility
650 NW 2nd Street
Hallandale Beach, Broward County, Florida 33009
Terracon Project No. 34237064

Dear Mr. Camaj:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced subject property (hereinafter known as the 'site'). This assessment was performed in accordance with Terracon Proposal No. P34237064.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide other environmental, geotechnical, construction materials, and facilities services on a wide variety of projects locally, regionally, and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

Terracon Consultants, Inc.

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. P34237064 and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. The ESA was conducted under the supervision or responsible charge of Steven A. Harrison, Environmental Professional. Joshua V. Blanco performed the site reconnaissance on June 13, 2023.

Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The site is located at 650 NW 2nd Street in Hallandale Beach, Broward County, Florida, and is positioned in the southern portion of a larger parent parcel identified by the Broward County Property Appraiser's office with Parcel ID # 514228010021 (hereinafter referred to as the "site"). The site contains approximately xxxx square feet (sq.ft.) within the parent parcel that encompasses xxxxxx sq.ft. We understand that the project includes the construction of an electric bus charging and fleet facility at the site.

Historical Information

Since at least 1947, the western portion of the site was undeveloped vegetated land, and the eastern portion is not visible on the 1947 aerial provided by Environmental Data Resources (EDR). By 1949, the site is disturbed due to development of the adjoining western proprty. By 1985, the site is a grassed field with trees until at least 1999. Sometime between 2007 and 2010 the site is developed with an injection well and associated monitoring well. Since 201 the site has remained relatively unchanged to present day.

Areas to the north, east, and west are not visible on the 1947 aerial provided by EDR while the area to the south the western portion of the area was undeveloped vegetated land and eastern portion is fully not visible on the 1947 aerial provided by EDR. A residential home is visible to the south in 1951 until at least 1976 when the home was no longer visible. Between 1949 and 1951 surrounding residential and commercial development began and continued through at least 2007.

Records Review

Review of the environmental regulatory records for the site and the adjoining properties identified several facilities listed within the prescribed search distance for this assessment. The site was not listed on the property by address, however the site does contain an injection well and associated monitoring well that is a part of the operation of the water treatment plant adjoining to the east. The current and past operations of the site are not considered an REC. Based on the distance from the site, regional groundwater flow direction and the regulatory status of the surrounding facility listed, these facilities operations were not considered RECs to the site.

Hallandale Beach DDMS / Hallandale Beach TDMS Debris Staging Area

This facility is located west adjoining at 720 NW 2nd Street and is listed on the FL SWF/LF and FL RGA LF databases. Based on the review of the EDR report, the facility is a vacant grass parcel that has been designated as a temporary Debris Staging Area from 1995 through 2012, and as a temporary Disaster Debris Management Site (DDMS) for management of hurricane/storm-generated debris including yard trash from 2016 through 2017. The was permitted by the Florida Department of Environmental protection and there have been no records that the site has yet to be used as a DDMS, additionally no reported discharges or violations were documented for the facility, Terracon does not consider this listing to be a REC.

Dovetail Designs, Inc.

The Dovetail Designs, Inc. facility is south adjoining at 709 NW 2nd Street and is listed on the FL BROWARD CO. HM database. Based on a review of the files available on the Broward County online database, ENVIROS, the facility obtained a Hazardous Materials License in 2002. An environmental response closure inspection dated September 22, 2003 stated the facility had moved and there were no environmental issues noted. Based on no reported violations or discharges, the limited time in operation, and being located in a presumed cross gradient location, Terracon does not consider this listing to be a REC.

Commercial Warehouse

The Commercial Warehouse facility is south adjoining at 717 NW 2nd Street and listed on the FL ASBESTOS database. Although no files were located within the ENVIROS or NEXUS databases, the EDR report states that in January 2020 the facility was renovated. Based on the nature of the listing related to asbestos removal within a surrounding facility, Terracon does not consider this listing to be a REC.

City of Hallandale Beach WTP

The City of Hallandale Beach facility is east adjoining at 630 NW 2nd Street and is listed on the, Facility Index System (FINDS), Enforcement & Compliance History Information (ECHO), Tier 2 Facility Listing (FL TIER 2), Storage Tank Facility information (FL AST), Broward County Hazardous Material License (FL BROWARD CO. HM), Solid waste Facility Database (FL SWF/LF), Storage Tank Facility information (FL UST), Asbestos notification listing (FL ASBESTOS), Financial Assurance Listing (FL Financial Assurance), RCRA Very Small Quantity Generators (RCRA-VSQG), Risk Management Plans (RMP), and Underground Injection Wells Database Listing (FL UIC) databases. Since 1986, the facility maintained multiple USTs to present day with no reported discharges or violations. The facility prepared Monthly Operation Reports for Treating Raw Ground Water or Purchased Finished Water that were submitted to the Florida Department of Health (FDOH) since November 2009. The facility was designated as a yard trash disposal facility in 2002 and by March 2009 the facility was associated with the FDEP Waste Tire Collector Registration due to on-site maintenance of fleet vehicles. Based on the distance of these operations from the site no reported violations or discharges, and the presumed regional groundwater flow direction, Terracon does not consider this listing to be a REC.

Site Reconnaissance

The site is currently a parking, staging, and storage area for the City of Hallandale, trash and recycling services, including garbage truck parking, storage, staging of new unused dumpsters and residential trash, recycling receptacles. The site also has a garbage truck wash out area in the SW corner of the site and three shipping containers for storage of miscellaneous materials, equipment and tools.

Adjoining Properties

The adjoining property to the east was the City of Hallandale Beach Public Works Department and the Historic Hallandale School House. The adjoining property to the north was a stormwater retention area for the Hallandale Beach Public works department and the site, followed by an unpaved access road, followed by single family homes . The adjoining property to the west was a vacant empty lot, followed by the right of way NW 8th Avenue, followed by multi family housing. The adjoining property to the south was the right of way of NW 2nd Street followed by commercial and residential properties.

Radon Records Review

According to the Broward County Department of Health, the site is located in EPA Zone 3, which has a predicted average indoor screening level of less than 2 picoCuries of radon per liter of air (pCi/L). The EPA recommends a guideline action level of 4.0 pCi/L for annual average indoor radon concentrations in residential properties. The action level is based on an exposure of 18 hours per day for 40 years. According to a U.S. Department of Energy environmental assessment, radon is much less of a concern in commercial buildings than in residential buildings as these buildings usually have mechanical ventilation and

occupants are typically not in the buildings as many hours a week as they are in their homes. No action level has been established for commercial buildings or occupational exposure.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E1527-21 at 650 NW 2nd Street , Hallandale Beach, Broward County, Florida, the site. Recognized Environmental Conditions (RECs), Controlled RECs (CRECs) and/or Significant Data Gaps (SDGs) were not identified in connection with the site.

Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon did not identify RECs, CRECs, or SDGs in connection with the site. As such, no additional investigation is warranted at this time.

1.0 INTRODUCTION

1.1 Site Description

Site Name	Electric Bus Charging & Fleet Facility
Site Location/Address	650 NW 2nd Street, Hallandale Beach, Broward County, Florida
Land Area	Approximately 1.75 acres
Site Improvements	Paved area for Vehicle and Equipment Storage, Truck equipment wash out area, 2 paved pump manifold areas associated with the injection wells for the adjoining water plant.
Anticipated Future Site Use	Proposed Electric Bus Charging Station
Reason for the ESA	Identify Recognized Environmental Conditions (RECs) prior to grant funding.

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. . The site and adjoining properties are depicted on the Site & Vicinity Map and the Site Diagram, which are included in Appendix A as Exhibit 2 and Exhibit 3 respectively. Acronyms and terms used in this report are described in Appendix F.

1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal Number P34237046 , and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. Recognized environmental conditions are defined by ASTM E1527-21 as “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.” A de minimis condition is not a recognized environmental condition.

This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews (including local government inquiries, as applicable), and a visual noninvasive reconnaissance of the site and adjoining

properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

As requested by the client, the following additional services were performed:

- Radon Records Review

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations, and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability

of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- A response from a request for information was not revived was not received from the Florida Department of Health (FDOH). Based on the other available information regarding the historical use of the site and the environmental regulatory history, including online records at the FDOH online database, this is data gap is not considered significant.
- A response from a request for information was not revived was not received from the Broward County Sheriff Fire Rescue Department. Based on the other available information regarding the historical use of the site and the environmental regulatory history this is data gap is not considered significant.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances, petroleum products or PFAS compounds may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of City of Hallandale Beach FL. Use or reliance by any other party is prohibited without the written authorization of City of Hallandale Beach FL and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Agreement. The limitation of liability defined in the Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-21 Section 4.6. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-21.

1.6 Client Provided Information

Prior to the site visit the client's representative was asked to provide the following user questionnaire information as described in ASTM E1527-21 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client's Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.			X
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.			X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.			X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X
Obvious Indicators of Releases at the site.			X

The client did not provide the requested User's information as of the issuance date of the report. Terracon assumes the client is evaluating the questionnaire information outside the context of Terracon's Phase I ESA scope of work and report. A copy of the incomplete questionnaire is included in Appendix C.

2.0 PHYSICAL SETTING

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 8 feet above sea level	USGS Topographic Map, Fort Lauderdale South, FL (1994), Port Everglades, FL (1983) and North Miami, FL (1994) (Appendix A)
Topographic Gradient	Relatively flat with a slight gradient to the west	
Closest Surface Water	Manmade pond, approximately 40 feet to the north of the site.	
Soil Characteristics		
Soil Type	Dade fine sand	Broward County, FL Soil Survey Dated 1976 and Natural Resources Conservation Service (NRCS) Soil Survey: http://websoilsurvey.nrcs.usda.gov/app
Description	Dade fine sand is nearly level, well drained sandy soil on slightly elevated flatlands in the southeastern part of the county.	
Geology/Hydrogeology		

Physical Setting Information		Source
Formation	Miami Limestone	Schmidt, Walter, Florida Geological Survey, Open File Report 80, Text to Accompany the Geological Map of Florida, 2001
Description	The Miami Limestone consists of two facies, an oolitic facies and a bryozoan facies (Hoffmeister et al. [1967]). The oolitic facies consists of white to orangish gray, poorly to moderately indurated, sandy, oolitic limestone (grainstone) with scattered concentrations of fossils. The bryozoan facies consists of white to orangish gray, poorly to well	

Physical Setting Information		Source
	indurated, sandy, fossiliferous limestone (grainstone and packstone). Beds of quartz sand are also present as unindurated sediments and indurated limey sandstones. Fossils present include mollusks, bryozoans, and corals. Molds and casts of fossils are common. The highly porous and permeable Miami Limestone forms much of the Biscayne Aquifer of	

Physical Setting Information		Source
	the surficial aquifer system.	
Estimated Depth to First Occurrence of Groundwater	8-10 feet	Manual Depth to water measurements form wells at the Ajoing water plant reviewed at the USGS National Water Information System: Web Interface: https://nwis.waterdata.usgs.gov/usa/nwis/gwlevels/?site_no=255916080092001 and https://nwis.waterdata.usgs.gov/usa/nwis/gwlevels/?site_no=255918080091801
*Hydrogeologic Gradient	Not known –May be inferred to be to the east since the site is within Zone 2 (500 feet radii) of the two public water supply wells at the east adjoining water plant	

*The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, and Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10-to-15-year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps, aerial photographs, and Sanborn maps are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. EDR did not provide Sanborn maps.

- Topographic maps: EDR Historical Topo Map Report; Fort Lauderdale South, FL and North Miami, FL Quads: 1947, 1949, 1950, 1962, 1969, 1970, 1972, 1983, 1988, 1994, 2012, 2015, 2018 (1:24,000)
- Aerial photographs: EDR Aerial Photo Decade Package; 1947, 1949, 1951, 1968, 1961, 1968, 1973, 1976, 1985, 1988, 1992, 1995, 1998, 1999, 2007, 2010, 2015, 2019

Historical Maps and Aerial Photographs

Direction	Description
Site	Since at least 1947, the western portion of the site was undeveloped vegetated land, and the eastern portion is not visible on the 1947 aerial reviewed. By 1949, the site was disturbed due development on the adjoing western property. Between 1951 until at least 1976, the site was used to stage and manage and stage aggregate form a borrow pit located approximately 600 feet west of the site. By 1985, the site was a grassed field with trees until at least 1999. Sometime between 2007 and 2010, the site was developed and has remained relatively unchanged to present day.
North	Area was not visible on the 1947 aerial reviewed. By 1949, the area was disturbed due to western area development with residential development visible beyond. By 1992, the area was developed with residential homes and then in 2007 and retention pond was visible in conjunction with site development and has remained relatively unchanged to present day.
East	Area was not visible on the 1947 aerial By 1949 dirt roads are visible and by 1949 the area was disturbed due to western area development with commercial development beyond. Sometime between 1968 and 1973, the adjoining property was developed with Hallandale Public Works and has remained relatively unchanged to present day. Sometime between 2007 and 2010, the Historic Hallandale School house was relocated to east adjoining property.
South	The western portion of the area was undeveloped vegetated land and eastern portion was not fully visible on the 1947 aerial. By 1951 the area was undeveloped vegetated land with residential development beyond. Sometime between 1988 and 1992 the area was developed with commercial and residential buildings and has remained relatively unchanged to present day.

Direction	Description
West	Area was not visible on the 1947 aerial. By 1949, the area was disturbed due to area development and by 1951 and a large commercial building was visible through at least 1976. By 1985, area was a grassed field with NW 8th Ave and manmade pond beyond. By 2007, residential apartments are developed west of the vacant adjoining parcel and has remained relatively unchanged to present day.

3.2 Historical City Directories

The city directories used in this study were made available through EDR (selected years reviewed: 2020-1942) and were reviewed at approximate five-year intervals, if readily available. The year a listing was first available was 1955. The current street address for the site was identified as 650 NW 2nd Street.

Historical City Directories

Direction	Description
Site	650 NW 2nd Street 2020-1971 Hallandale Public Works Dept
North	NW 3rd Court 1955-2020: Residential listings
East	630 NW 2nd Street 2020-1971 Hallandale Public Works Dept
South	709-739 NW 2nd Street 2020-1971 Commercial Warehouse with Multiple tenants 632 NW 1st Street 2020-2017 Archbishop Hurley Hall, Catholic Health Svc 2014-1992 Residential listings
West	NW 2nd Street 1955-1964: Hallandale Rock Corp and Residential listings 1976: Hallandale Rock and Sand and Residential listings

3.3 Site Ownership

Based on a review of information obtained from the Broward County Property Appraiser's office online records, the current site owner is City of Hallandale Beach. See a copy of Property Appraiser information contained in Appendix C.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.6 Interviews Regarding Current and Historical Site Uses

The following individuals were interviewed regarding the current and historical use of the site.

Interviews

Interviewer	Name / Phone #	Title	Date/Time
Joshua Blanco	Tom Camaj	Capital Projects Manager	May 9, 2023

Terracon interviewed Mr. Camaj, Capital Projects Manager, prior to the site reconnaissance visit. Mr. Camaj indicated that he has been familiar with the site for approximately one year and that he was unaware of any pending, threatened, or past environmental litigation; possible violations of environmental laws; possible property restrictions; or site use limitations. Additionally, Mr. Camaj was not aware of or any spills and/or releases of petroleum product or hazardous materials to the environment, or any conditions that may cause a future spill and/or release of petroleum products or hazardous materials to the environment.

3.7 Prior Report Review

Terracon requested the client provide any previous environmental reports they are aware of for the site. Previous reports were not provided by the client to Terracon for review.

4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company in a report dated Database Report Date. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient, and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained. It should be noted that the site is within Zone 2 (500 feet radii) of the two public water supply wells at the east adjoining water plant, since the site is within the cone of influence of these two wells it can be inferred that the groundwater flow direct at the site is primarily to the east.

4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

Federal Databases

Database	Description	Distance (miles)	Listings
CERCLIS	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	0
CERCLIS / NFRAP	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0
IC / EC	Institutional Control/Engineering Control	Site	0
NPL	National Priorities List	1	0
NPL (Delisted)	National Priorities Delisted List	0.5	0

Database	Description	Distance (miles)	Listings
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1	0
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	2
RCRA Non-CORRACTS/ TSD	RCRA Non-Corrective Action Activity	0.5	0

State/Tribal Databases

Database	Description	Distance (miles)	Listings
Brownfields	Brownfields Areas	0.5	2
IC/EC	Institutional Controls / Engineering Controls	Site	0
LUST	Leaking Underground Storage Tanks	0.5	13
SHWS	State Hazardous Waste Site	0.5	0
SWF/LF	Solid Waste Facilities/Landfills	0.5	9
UST	Underground Storage Tanks	Site and adjoining properties	1
VCP	Voluntary Cleanup Program	0.5	0

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report in Appendix D.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

Listed Facilities

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Findings Summary
Hallandale Beach DDMS / Hallandale Beach TDMS Debris Staging Area 720 NW 2nd Street / NW 8th Ave & 2nd Street	West Adjoining / Down-Gradient	FL SWF/LF, FL RGA LF	No REC
Dovetail Designs, Inc. 709 NW 2nd Street	South Adjoining / Cross-Gradient	FL BROWARD CO. HM	No REC
Commercial Warehouse 717 NW 2nd Street	South Adjoining / Cross-Gradient	FL ASBESTOS	No REC
City of Hallandale Beach 630 NW 2nd Street	East Adjoining / Cross-Gradient	FINDS, ECHO, FL TIER 2, FL AST, FL BROWARD CO. HM, FL SWF/LF, FL UST, FL ASBESTOS, FL Financial Assurance, RCRA-VSQG, FL ASBESTOS, RMP, FL UIC	No REC

Hallandale Beach DDMS / Hallandale Beach TDMS Debris Staging Area

Hallandale Beach DDMS / Hallandale Beach TDMS Debris Staging Area Street is west adjoining at 720 NW 2nd Street / NW 8th Ave & 2nd Street and is listed on the FL SWF/LF and FL RGA LF databases. Information within the EDR report indicated the facility was designated as a Debris Staging Area from 1995 through 2012, and according to the files available on the Florida Department of Protection (FDEP) online database, NEXUS, the facility was designated as a Disaster Debris Management Site (DDMS) for management of hurricane/storm-generated debris including yard trash as of 2016. Based on the nature of the facility and the lack of report discharges or violations, Terracon does not consider this listing to be a REC.

Dovetail Designs, Inc.

The Dovetail Designs, Inc. facility is south adjoining at 709 NW 2nd Street and is listed on the FL BROWARD CO. HM database. Based on a review of the files available on the Broward County online database, ENVIROS, the facility had a Hazardous Materials License

in 2002. An environmental closure inspection dated September 22, 2003 stated the facility had moved and there were no environmental issues noted. Based on the lack of reported violations or discharges and the limited time in operation, Terracon does not consider this listing to be a REC.

Commercial Warehouse

The Commercial Warehouse facility is south adjoining at 717 NW 2nd Street and listed on the FL ASBESTOS database. Although no files were available on the ENVIROS or NEXUS databases, the EDR report states that in January 2020 the facility conducted abatement efforts as part of the renovation of the facility. Although there is no documentation on the renovations, based on the nature of the listing, Terracon does not consider this listing to be a REC.

City of Hallandale Beach WTP

The City of Hallandale Beach facility is east adjoining at 630 NW 2nd Street and is listed on the Facility Index System (FINDS), Enforcement & Compliance History Information (ECHO), Tier 2 Facility Listing (FL TIER 2), Storage Tank Facility information (FL AST), Broward County Hazardous Material License (FL BROWARD CO. HM), Solid waste Facility Database (FL SWF/LF), Storage Tank Facility information (FL UST), Asbestos notification listing (FL ASBESTOS), Financial Assurance Listing (FL Financial Assurance), RCRA Very Small Quantity Generators (RCRA-VSQG), Risk Management Plans (RMP), and Underground Injection Wells Database Listing (FL UIC). The facility maintained multiple USTs at a location over 450 feet down gradient of the site from 1986 to present day with no reported discharges or violations. The facility maintained Monthly Operation Reports for Treating Raw Ground Water or Purchased Finished Water that were submitted to the Florida Department of Health (FDOH) since November 2009. The facility was registered as a yard trash disposal facility in 2002. In March 2009 the facility registered as a FDEP Waste Tire Collector Registration due to on-site maintenance of fleet vehicles.

The following are operations associated with this facility but are actually located on the site: An injection well for the demineralization concentrate, a byproduct of the adjoining water treatment plant, and a dual zone monitoring well for the injection well, are located on the southern and central portions of the site respectively. Latest Monitoring report observed in the file for May 2023 indicates that the injection well operation is in compliance, no reports of violations or impacts to the Floridan and/or Biscayne aquifer were found during the files review. It should be noted that the site is within Zone 2 (500 feet radii) of the two public water supply wells at the east adjoining water plant. Based on no reported violations or discharges associated with the site, Terracon does not consider this listing to be a REC.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed one facility in the unmapped section. Determining the location of unmapped facility is beyond the scope of this assessment; however, none of this facility was identified as the site or adjacent properties. This facility is listed in the database report in Appendix D.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Florida Department of Environmental Protection (FDEP) / Email on May 12, 2023	Mr. Tommy Moore with the FDEP responded June 14, 2023 with files that are further discussed in Section 4.1
Broward County Fire Rescue (BCFR) / Email on May 12, 2023	At the issuance of this report a response has not yet been received from BCFR.
Florida Department of Health (FDOH) / Email on May 12, 2023	At the issuance of this report a response has not yet been received from FDOH.

5.0 SITE RECONNAISSANCE

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site & Vicinity Map and the Site Diagram, which are included in Appendix A as Exhibit 2 and Exhibit 3 respectively. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

Site Reconnaissance	
Field Personnel	Joshua V. Blanco
Reconnaissance Date	May 16, 2023
Weather Conditions	Calm, clear, 75 degrees.
Site Contact/Title	Tom Camaj / Project Manager
Building Description	

Site Reconnaissance				
Building Identification	Building Use	Approx. Construction Date	Number of Stories	Approx. Size (ft²)
No buildings present	Not Applicable	Not Applicable	Not Applicable	Not Applicable

Site Utilities	
Drinking Water	City of Hallandale Beach
Wastewater	City of Hallandale Beach
Electric	FP&L
Natural Gas	None.

5.2 Overview of Current Site Occupants and Operations

Currently, the site is used for parking for the sanitation trucks for the City of Hallandale, staging for empty dumpsters, storage of new and unused residential recycling and trash containers, a wash down station for the sanitation trucks, three shipping containers for storage of miscellaneous equipment, storage for spare dumpster parts. An injection well for demineralization concentrate from the adjoining water treatment plant and associated pumps and manifolds is located on the southern portion site a 25 x 20 feet concrete pad. Additionally, a dual zone monitoring well is located on the central portion of the site on a 15 x 15 feet concrete pad with associated pumps and manifolds to monitor groundwater in the vicinity of the injection well.

5.3 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an “X”) are discussed in more detail following the table.

Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	

Category	Item or Feature	Observed or Identified
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	X
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas, or mineral production	
	Other processes or equipment	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	
	Drums, barrels, and/or containers ≥ 5 gallons	
	MSDS or SDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins, and/or dry wells	X
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	
	Interior floor drains	
Electrical Transformers/ PCBs	Transformers and/or capacitors	
	Other equipment	
	Stressed vegetation	
	Stained soil	

Category	Item or Feature	Observed or Identified
Releases or Potential Releases	Stained pavement or similar surface	X
	Leachate and/or waste seeps	
	Trash, debris, and/or other waste materials	
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent, or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	X

Site Operations, Processes, and Equipment

Wash-down areas or carwashes

The site has a washdown area for the garbage trucks, the drain in the wash down area, is connected to a lift station that pumps the water to the adjoining water treatment plant.

Underground Chemical or Waste Storage, Drainage or Collection Systems

Sumps, cisterns, French drains, catch basins, and/or dry wells

A stormdrain located in the garbage truck parking area on the western portion of the site is connected to a lift station that pumps the water to the adjoining water treatment plant.

Releases or Potential Releases

Stained pavement or similar surface

Staining of the pavement in the garbage truck washout area and the garbage truck parking area was observed. These stains are considered de minimis.

Other Notable Site Features

Wells

An injection well for demineralization concentrate from the adjoining water treatment plant and associated pumps and manifolds is located on the southern portion site a 25 x 20 feet concrete pad. The well has FDEP UIC permit number 227805-005-UO/1X. The well injects reverse osmosis concentrate to a depth of between 2,862 and 3,500 feet below ground surface (bgs). Additionally, a dual zone monitoring well is located on the central portion of the site on a 15 x 15 feet concrete pad with associated pumps and manifolds to monitor groundwater in the vicinity of the injection well at the 1,400-1,448 feet bgs shallow zone and the 1,752-1,803 feet bgs lower zone.

6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

Adjoining Properties

Direction	Description
North	Residential homes
East	Hallandale Public Works Department
South	Commercial and residential development
West	Vacant grassed field

RECs were not identified observed with the adjoining properties.

7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, the following additional services were conducted.

7.1 Radon Records Review

Radon is a naturally occurring radioactive gas produced through the natural decay of uranium to stable lead. It is odorless, tasteless, and invisible. Elevated concentrations of radon can be found in soils and rocks containing uranium, granite, shale, phosphate, and pitchblende. Locations of these materials are highly unpredictable. Elevated levels of radon may also be found in soils containing certain types of industrial wastes, such as the by-products from uranium or phosphate mining. Radon can accumulate inside structures at concentrations that may pose risks to human health. Indoor radon levels are influenced by building construction and the concentration of radon in the underlying soil.

Terracon reviewed the EPA Map of Radon Zones, prepared by the EPA and the U.S. Geological Survey, the site is located in EPA Zone 3 (Lowest Potential: less than 2 pCi/L). The EPA recommends a guideline-action level ǁ of 4 pCi/L for an annual average indoor

radon concentration. In addition, Terracon reviewed the Florida Department of Community Affairs (DCA) Radon Protection Map for new large buildings. More than 5% of all new large buildings, single family homes and duplexes in areas of the Broward County are expected to have annual radon levels above the US Environmental Protection Agency action level; however, the site is located in an area of the County where DCA has determined that radon controls are generally unnecessary to reduce the likelihood of elevated radon levels in new buildings.

8.0 DECLARATION

I, Steven A. Harrison, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All-Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Steven A. Harrison

Sr. Associate/ Regional Environmental Services Department Manager - South Florida.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

COLORTONE INC (Continued) **1000978629**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain

THE CHEETHA (Continued) **1010492060**

limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

HALLANDALE BEACH FIRE RESCUE STATION #7 (Continued) **1018376079**

discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

ALASKA BREEZE CORP (Continued) **1016051556**

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR EMISSIONS CLASSIFICATION UNKNOWN

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

HALLANDALE AUTO ELECTRIC (Continued) **1000461121**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

North Map:	11496429 FORT LAUDERDALE SOUTH, FL
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

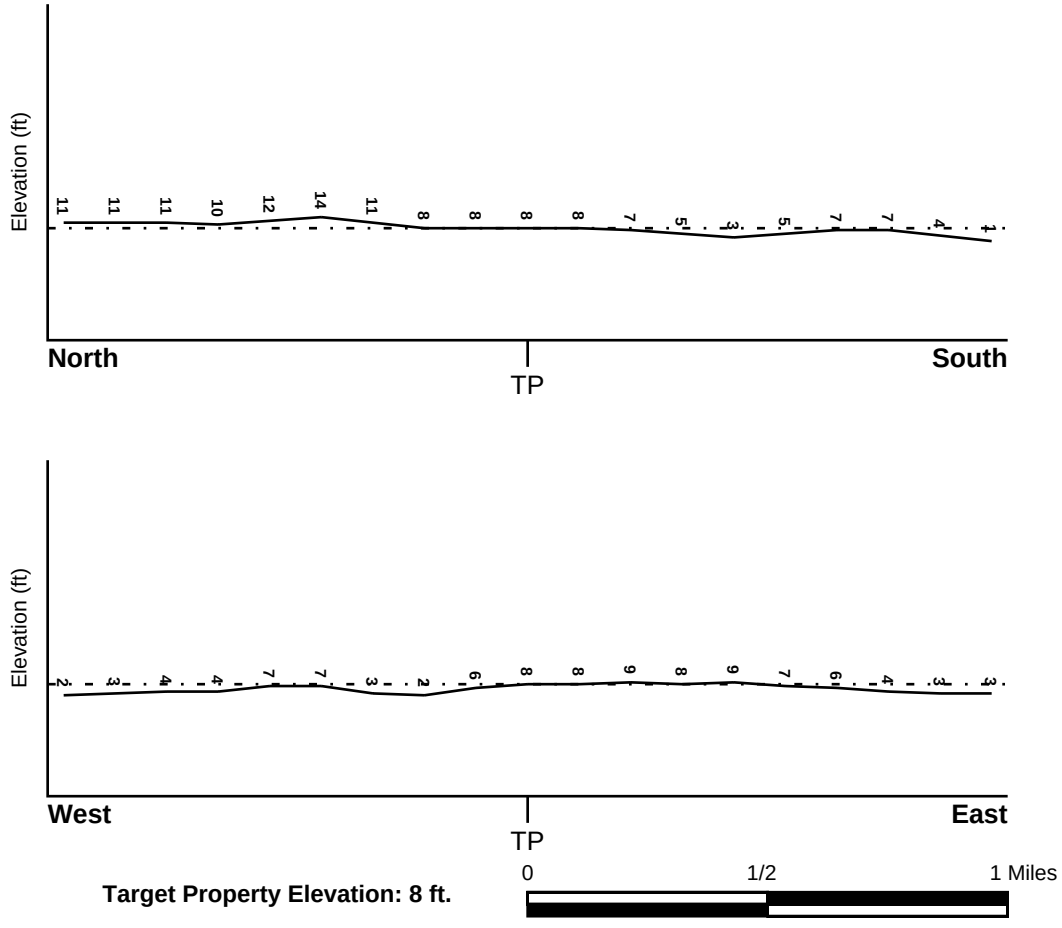

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
12011C0731H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NORTH MIAMI	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Dade

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	27 inches	fine sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
2	27 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
3	35 inches	35 inches	bedrock	Not reported	Not reported	Max: 141 Min: 14	Max: Min:

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 3

Soil Component Name: Arents

Soil Surface Texture: cobbly sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	cobbly sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 5.6
2	9 inches	31 inches	sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 5.6
3	31 inches	59 inches	sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 5.6

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: cobbly sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX E

CREDENTIALS

STEVEN A. HARRISON, P.G.
ENVIRONMENTAL SERVICES DEPARTMENT MANAGER

PROFESSIONAL EXPERIENCE

Mr. Harrison is a Professional Environmental Consultant and Operations Manager that specializes in providing responsive, cost effective, technically accurate and regulatory focused solutions to meet client's project and operational requirements.

As a Professional Geologist, licensed in Florida and Georgia, with more than 32 years of successful experience, Mr. Harrison continuously exceeds expectations by resolving environmental situations that clients face. Mr. Harrison's diverse environmental experience includes the assessment and remediation of impacted groundwater and soil, real estate transactional due diligence assessment (Phase I/II Environmental Site Assessments [ESAs]), storage tank system management, industrial and RCRA waste disposal, wildlife surveys and compliance assistance with federal and State environmental regulations (SPCC Plans). Mr. Harrison has worked with a diverse array of clients ranging from the independent property owner to local, regional, and State municipalities and Fortune 500 companies to address and resolve their business and regulatory environmental concerns. Mr. Harrison's knowledge of local, state, and federal regulatory requirements is critical to supporting client's objectives to maintain compliance with all applicable regulatory requirements.

Mr. Harrison has performed and/or supervised hundreds of site investigations to address subsurface impacts under the jurisdiction of local (Florida Counties) and State (Florida, Georgia, New York) regulatory authorities. Furthermore, he has performed and/or supervised thousands of environmental due diligence projects throughout a large portion of the eastern United States.

PROJECT EXPERIENCE

Property Redevelopment Project - Aventura, Florida *
Project Manager and lead technical specialist for property that was being redeveloped as a hotel. Work included Phase I/II ESAs, site assessment for the regulatory agency, and source removal to address arsenic and petroleum impacted soils. Assisted contractors and owners with Health and Safety aspects, air monitoring and soil management at the project site during installation of the building foundation.

Multiple Sites - Pompano Beach, Florida *
Project Manager for Phase I/II ESAs and site assessments (62-770/ 62-780 FAC) that were conducted within the City of Pompano Beach Community Redevelopment Agency's (CRA's) Northwest Brownfields region at properties proposed for redevelopment.

Multiple Sites - Broward and Miami-Dade Counties, Florida
Project Manager for multiple Phase I/II ESAs that were conducted at properties across both counties to assess for the presence of recognized environmental conditions (RECs) and, if present, to assess for potential impacts subsurface groundwater and soil quality.

Education

MS, Marine Geology and Geophysics, Emphasis: Geo-Chemistry

Rosenstiel School of Marine and Atmospheric Sciences, University of Miami, 1988

BS, Geology
State University of New York Binghamton, 1980 – 1984

Registrations

Professional Geologist
Florida, No. 0001390

Professional Geologist
Georgia, No. 001491

FL. Licensed Mold Assessor No.MRSA508

FL. Licensed Sales Associate SL3069031 (Realtor –Florida)

Certifications

8- Hr Hazmat Health and Safety Training Updates (Current)

40- Hr Hazmat Health and Safety Training (1989)

Short Course: Assessing Environmental Risk in Property Transactions (1990)

Short Course: How to Comply with Florida's Haz Waste Regulations for Generators

Approximately 25 square Block Area - Southern Miami Beach, Florida *
Project Manager for performance of Phase I and II ESA's across approximately 25 square block area of southern Miami Beach. Identified USTs, AST's, former dry-cleaning facilities and a former above ground fuel farm. It was estimated that the remediation of the contamination identified would cost approximately $8,000,000 to remedy.

Banking Institution - South Florida Region *
Regional coordinator for the performance of 65 Phase I ESAs for a banking institution within two months in the South Florida region. Recognized environmental concerns were evaluated during subsequent Phase II investigations.

Lead Recycling Facility - Miami-Dade County, Florida *
Assessment and development of a remedial strategy for a lead recycling facility that was placed under a consent order with the FDEP. Groundwater and soil was impacted at more than 100 feet from the facility within offsite facilities and public rights of way from various transport mechanisms that affect surficial and subsurface migration. Evaluating source removal and remedial technologies to minimize the expense associated with remedial efforts.

Small Business Administration - North East Quadrant of the United States *
Regional coordinator and reviewer for the performance of 60 Phase I ESAs for the Small Business Administration within 2 months in the north east quadrant of the United States.

Ice Manufacturing Facilities - Various Locations throughout Florida *
Project Manager for Phase I and II ESAs of ice manufacturing facilities throughout Florida. Evaluated sites for contamination relating to PCB's, waste oil, petroleum, and chromium.

Former Chemical Company - North Miami, Florida *
Project Manager of Phase I and II ESA which identified a former chemical company occupied the now vacant parking lot. A soil gas survey of the site identified chlorinated solvents beneath the site and subsequent groundwater sampling identified approximately 80,000 ppb of tetrachloroethene at 40 feet below grade

Potential Property Developments - Miami's Downtown District and Miami Beach, Florida *
Successfully directed and managed multiple site assessments and aggressive remedial (source removal) efforts to enable property development within Miami's downtown district and within Miami Beach. These expedited efforts were completed and received regulatory closure within a few months enabling site developers to construct condominium towers without delays from managing impacted materials.

Former Gas Station, Miami Beach - Florida *
Project Manager for Phase I and II ESA of property on Miami Beach. Property was found to be former gas station at which tanks were reportedly removed. Phase II testing found contamination in the tank vault accompanied by an improperly abandoned UST. More than 600 tons of contaminated soil and 2,400 gallons of groundwater were removed to remediate the area to current State Cleanup Target Levels within 4 days over a holiday weekend. The site was repaved by the following Monday in time for a building department inspection of the property.

Closed Loop Vacuum Extraction and Groundwater Treatment System - Miami-Dade County, Florida *
Assessment and remediation of large petroleum spill beneath the driveway of a national package delivery company. The project involved the assessment of soil and groundwater contamination and resulted in the design and installation of Miami Dade County's first closed loop vacuum extraction and groundwater treatment system in which collected water vapor was treated and returned to the aquifer after stripping of the volatile components. The facility remained operational throughout all of the site activities and no down time was experienced by the property owner.

** Work performed prior to joining Terracon.*

JOSHUA V. BLANCO, CHMM.
SENIOR PROJECT MANAGER

PROFESSIONAL EXPERIENCE

Mr. Blanco is an Environmental Consultant and Senior Project Manager that specializes in providing responsive, cost effective, accurate and regulatory focused solutions to meet client's requirements.

As an Environmental Consultant, Mr. Blanco has more than 18 years of experience. Mr. Blanco's diverse environmental experience includes the assessment and remediation of impacted groundwater and soil, real estate due diligence assessment (Phase I/II Environmental Site Assessments), storage tank system management, industrial and RCRA waste disposal, wildlife surveys and compliance services with federal and State environmental regulations (SPCC/SWPP Plans, NPDES permitting).
Mr. Blanco has worked with a diverse clientele ranging from independent property owners to state and local governments and Fortune 500 companies to resolve regulatory environmental concerns. Mr. Blanco's knowledge of local, state, and federal regulations is critical to supporting client's in maintaining compliance with regulatory requirements.

Mr. Blanco has performed and/or supervised hundreds of site investigations and environmental due diligence projects throughout the United States including: Florida Counties and states of: Florida, Texas, Alabama, California, North and South Carolina, Maryland, Virginia, West Virginia, Georgia, New York.

PROJECT EXPERIENCE

I-595 Improvement Project Broward County, FL*
Project Manager and lead technical specialist for roadway improvement project. Work included environmental consulting for the roadway contractor, source removal to address arsenic and petroleum impacted soil, dewatering support including treatment of discharge effluent, NPDES permit compliance, Environmental Resource Permit Compliance, Army Corp of Engineers dredge and fill permit compliance. Assisted contractor and owners with, air monitoring and soil management, dewatering support at the project site during installation of the bridge pier foundations, installation of utility tunnels underneath I-595 and removal of ACM coated oil pipeline from the project corridor.

Multiple Sites – Nationwide *
Project Manager and Regional Lead for Phase I/II ESAs and Environmental Compliance Audits for National Private Clients from 2004 to 2022.

Multiple Sites – Nationwide *
Project Manager and Regional Lead for stormwater compliance program for a national big box retailers, conducted dozens of stormwater compliance audits from 2004 to 2022.

FDOT District 6 Miami-Dade, Monroe Counties, Florida *
Project Manager for the District 6 contamination and remediation contract including management of multiple Level I and Level II assessments for roadway projects, source removals, utility installation in a contaminated. Additionally conducted environmental impacts reviews for the PD&E process.

***** *Work performed prior to joining Terracon*

Staff Scientist

PROFESSIONAL EXPERIENCE

Gabrielle serves as a Staff Scientist in the West Palm Beach office. Her responsibilities involve conducting Phase I Environmental Site Assessments (ESAs) consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This includes researching the historical development and usage of properties, performing site reconnaissance, soil, air, and groundwater sampling, preparing written reports, and reviewing regulatory agency files.

Her experience includes conducting Stormwater Pollution Prevention Plan (SWPPP) inspections for commercial and residential developments. As a certified Florida Department of Environmental Protection (FDEP) Stormwater Pollution inspector, Gabrielle has the knowledge of federal, state and local permits which enables her to review and develop Construction SWPPPs, a requirement for the National Pollution Discharge Elimination System (NPDES) Generic Permit. Gabrielle also has experience with projects on sites in the FDEP petroleum programs. Gabrielle has experience with Phase 1 Environmental Site Assessments (ESAs) and soil, air, and groundwater sampling.

EDUCATION

Bachelor of Science in Environmental Studies at the University of Central Florida 2017

CERTIFICATIONS

FDEP Qualified Stormwater Management Inspector

OSHA 40 Hour HAZWOPER Training

WORK HISTORY

Terracon Consultants, Inc., Staff Scientist, 2021 - Present

Terracon Consultants, Inc., Field Scientist, 2020 – 2021

CMS Environmental Solutions, Environmental Analyst, 2018-2020

PROJECT EXPERIENCE

Palm Beach County Fire Rescue Station #40 – Boynton Beach, Florida

Staff Scientist. Prepared a Construction Storm Water Pollution Prevention Plan, in accordance with National Pollution Discharge Elimination System (NPDES) Generic Permit, for the development and integration of a stormwater system for a new Fire Rescue Station in Boynton Beach.

The Carlisle of Palm Beach Landfill Gas Sampling – Lantana, Florida

Staff Scientist. Terracon installed six methane monitoring probes on the property and subcontracted a driller to abandon six previously existing monitoring wells on-site in accordance with Ch. 62-532.500(5) of the FAC. Terracon returned to the site to measure methane concentrations from the methane sampling points. Gabrielle was responsible for the measurement and recording of the methane concentrations.

Royal Palm Beach Commons Natural Attenuation Monitoring (NAM) – Royal Palm Beach, Florida

Staff Scientist. The project consists of a 160±acre parcel of land that was developed into a community park know as Royal Palm Beach Commons. The master plan of the park includes a community center; 9-hole executive golf course with a clubhouse, cart barn and starter hut; recreational area; horticultural center; community arts center; restaurant/sporting center; an access to roadway to all amenities; vehicular parking lots; and an extensive lake system for canoeing and kayaking. Terracon preformed sampling and analysis during construction and source removal to assure that the construction contractor followed the project environmental specifications Terracon performed a comprehensive post-construction site assessment in accordance with Chapter 62-780, Florida Administrative Code (FAC). The site assessment report summarized all environmental assessment and remediation activities from 2007 through 2014. Terracon is currently performing long-term groundwater monitoring at the site in advance of site closure. Gabrielle is responsible for collecting groundwater samples and for assisting in the preparation of the NAM reports.

C-23/24 North Reservoir Project – Ft. Pierce, Florida
Staff Scientist. The project consists of eight tracts of land totaling 2,584 acres to be used to construct a Reservoir to provide water quality improvements in the Indian River Basin. Gabrielle provided oversite during demolition of point source locations and during source removal activities. She also conducted soil and groundwater sampling of point source locations.

LTC Ranch – Fort Pierce, Florida
Field Scientist. The project involved installation of temporary groundwater monitoring wells for the purpose of monitoring groundwater levels and groundwater quality parameters specified by the FDEP. Soil samples were collected and tested to determine arsenic levels. Gabrielle performed oversight during the removal of contaminated soil and ensured manifesting and documentation.

Fairfield Inn and Suites, Marriott, West Palm Beach, Florida
Field Scientist. Weekly and Post- Rain site inspections are conducted to ensure compliance under the NPDES Generic Permit. Gabrielle provided guidance to site superintendents, on the condition of their site and how to achieve complete compliance to avoid fines and possible site closure.

Greenacres Improvement, Phase 6 – Greenacres, Florida
Field Scientist. Prepared a Storm Water Pollution Prevention Plan, in accordance with National Pollution Discharge Elimination System (NPDES) Generic Permit, for the management of the stormwater system in a residential area of Greenacres.

L-15 Canal – Belle Glade, Florida
Field Scientist. Within the West Palm Beach Field Station Area along the east side of the L-15 canal, east of Browns Farm Road six culverts to be replaced. Gabrielle assisted in determining whether surficial soils at the site are suitable for excavation and disposal based on the potential presence of agrochemical residues. She also assisted in the preparation a letter report providing results and recommendations.

STA-1 West – Belle Glade, Florida
Field Scientist. Included seven parcels of land known as the STA-1 West Expansion No. 2 to delineate non-point and point sources. Gabrielle provided oversite during demolition of point source locations and during source removal activities. She also conducted soil sampling of point source locations.

Former Agriculture Property – Ft. Pierce, Florida
Field Scientist. Conducted a Phase I ESAs consistent with the procedures included in ASTM E1527-13.

Vacant Parcel – West Palm Beach, Florida
Field Scientist. Conducted a Phase I ESAs consistent with the procedures included in ASTM E1527-13.

DR Horton- Various locations in South Florida *
Environmental Analyst. For 18 single family home communities, weekly and post- rain site inspections were conducted to ensure compliance under the NPDES Generic Permit. Gabrielle provided guidance to site superintendents, on the condition of their site and how to achieve complete compliance to avoid fines and possible site closure.

* Work performed prior to joining Terracon.

APPENDIX F

DESCRIPTION OF TERMS AND ACRONYMS

Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining). Regulatory agencies have generally defined ACM as a material containing greater that one (1) percent asbestos, however some states (e.g., California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable. Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.

Description of Selected General Terms and Acronyms

Term/Acronym	Description
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally Exempt Small Quantity Generators
CFR	Code of Federal Regulations
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-21 as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report."
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic

Description of Selected General Terms and Acronyms

Term/Acronym	Description
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a "solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-21 as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition."
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program

Description of Selected General Terms and Acronyms

Term/Acronym	Description
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.

Description of Selected General Terms and Acronyms

Term/Acronym	Description
pCi/L	picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave"). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/ TSDs	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/ TSDs	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.

Description of Selected General Terms and Acronyms

Term/Acronym	Description
REC	Recognized Environmental Conditions are defined by ASTM E1527-21 as 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small Quantity Generator
SWF/LF	State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C 2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service

Description of Selected General Terms and Acronyms

Term/Acronym	Description
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-21, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	State and/or Tribal facilities included as Voluntary Cleanup Program sites.
VOC	Volatile Organic Compound
Wetlands	Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The Corps of Engineers Wetlands Delineation Manual (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present. The federal Clean Water Act which regulates "waters of the US," also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.
