**CCNA DESIGN OF CHAVES LAKE PARK
ENVIRONMENTAL CENTER AND EV BUS STATION****SCOPE OF WORK:****PURPOSE:**

The City of Hallandale Beach is seeking proposals from qualified firms, hereinafter referred to as the Consultant, in accordance with Florida Statutes, Chapter 287, Section 287.055, Consultants' Competitive Negotiation Act (CCNA), to provide comprehensive design services and construction administration for Chaves Lake Park, Environmental Center and Electric Bus Charging Station (Park) located at NW 8 Ave., Hallandale Beach, FL 33009. See attached Exhibit A – Site Survey, for more detailed location information.

The Consultant shall demonstrate substantial experience and capabilities to provide landscape architectural, architectural, environmental, and engineering services, including but not limited to, conceptual design, design development, preparation of construction documents, permitting services, and construction administration services.

All work shall be designed in compliance with the current Florida Building Code in addition to City Zoning requirement codes and City and County Ordinances. The selected Consultant shall prepare all documents in the formats required by the City of Hallandale Beach and adhere to all City project deadlines.

EXHIBITS FOR THIS RFP:

This RFP contains the following which must be reviewed by proposing firms.

- Exhibit A - Site Survey
- Exhibit B - APTA-BTS-BMF-RP-001-11
- Exhibit C – Site Visit Location

SCOPE OF WORK:

Chaves Lake Park shall be transformed into an environmental center to include park amenities with a focus on environmental education and sustainable practices, as well as a new electronic bus charging station. A third potential component to the environmental center would include a new solar panel system on the lake. Design may need to include the electrical engineering required to connect the park and electric bus charging stations to the solar panel system, in the future, should this component come to fruition. The overall design of the site must include a seamless transition between the sustainably designed park, which includes a small environmental center, and the electric bus charging station. The bus charging station must be designed in accordance with American Public Transportation Association (APTA) recommended practice: APTA BTS-BMF-RP-001-11 (Exhibit B). The station shall also include all charging infrastructure, Solar energy (Solar Roof) system, backup generator and storage/support facilities.

**CCNA DESIGN OF CHAVES LAKE PARK
ENVIRONMENTAL CENTER AND EV BUS STATION**

Consultant must be familiar with the development of parks and recreation areas, as well as, indoor space planning and design, and electric vehicle charging infrastructure. The design professionals are encouraged to be progressive in their planning and design approach.

The park portion of the project shall be funded through the City's Parks General Obligation Bond. The electric bus charging station portion of the project shall be funded through the City and Community Redevelopment Agency. In order to prevent co-mingling of funds, Consultant may be required to itemize and split billing for the different portions of the project.

Time is of the essence for this project. Consultant shall be required to conform to strict deadlines and expedite deliverables, as necessary. A detailed schedule shall be negotiated between the Consultant and City and deadlines shall be strictly enforced.

Phase I - Design Development Phase

Consultant shall provide all associated Design Development Services necessary to bring the project to a successful completion, including but not limited to:

- Consultant shall conduct at least two internal City Charrettes, at least one presentation before the City Commission, and at least one Community Charrette(s) to seek input from the Community, City Commission and City Administration. These interactive sessions shall be presented in a workshop format, and Consultant shall incorporate agreed upon revisions in the next progress review presentation. Charrette may include multiple and/or individual meetings, if necessary. Recommendations are to be presented by Consultant at a Community meeting with final approval at a City Commission public meeting.
- Consultant shall meet with City staff, operating personnel, Broward County Transit, Florida Department of Transit, and any other City designated environmental, energy and traffic consultants to gather information to determine space and equipment needs, overall operational and maintenance needs, and programming for both the park and charging station. Consultant shall develop design for any necessary bays, office, dispatching and operational control, and storage areas to support the charging station and parks operations.
- Consultant shall meet with FPL to coordinate electricity requirements needed for the site and EV charging station, as well as the potential for a solar panel system on the lake, that may be connected to the park and EV stations in the future.
- Provide comprehensive professional landscape architectural, architectural, environmental, and engineering services for the project. Disciplines shall include, but not be limited to, transportation, environmental, mechanical, electrical, fire protection, telecommunications, interior design, landscape, irrigation, civil, structural, minimum LEED Silver Certification, and commissioning. Any specialty disciplines necessary to complete the project scope of service such as sound engineering consultant, as needed, and any other specialty sub consultants necessary to complete the project with all components for the operations of the facility and park amenities.

**CCNA DESIGN OF CHAVES LAKE PARK
ENVIRONMENTAL CENTER AND EV BUS STATION**

- Consultant shall prepare a detailed space allocation program for the charging station by identifying space requirements for major functions such as shops, work bays, dispatching and operational control, vehicle storage, maintenance and repair areas, parts storage, employee amenities, administrative spaces, and restroom facilities. Site spatial needs for requirements such as bus storage, fare retrieval, energy provision and wash facilities, and employee parking will also be identified. The program will reflect specific code issues such as ADA compliance and applicable building codes. A program report to document proposed alternatives will be prepared and verified with Agency personnel during the design forum.
 - The program will reflect the following:
 - Definition of all functions to be provided in the facility.
 - Dimensional criteria for both horizontal and vertical (e.g., height of bays) directions
 - Definition of all rooms, bays and spaces proposed for the facility.
 - Preliminary equipment and utilities required for cleaning.
 - Site operations requirements, including minimum turning radii, minimum distances between obstructions for turning, backing and deliveries.
 - Offsite requirements such as turn lanes, acceleration/deceleration lanes, esplanades and identified utility extensions.
 - Preliminary Energy Supply requirement for battery charging and energy storage requirements.
- Consultant shall coordinate and schedule pre-application meetings with applicable permitting agencies to ensure that the proposed design complies with applicable regulations, codes and standards including City's own codes and ordinances. Meeting minutes shall be documented and submitted to the City. This includes the coordination and facilitation of the Major Development Approval process including application, Development Review Committee, Planning and Zoning Board, and City Commission approvals, as required.

Phase II - Construction Administration Phase

The Consultant shall provide construction administration services to assure project is constructed in accordance to plans and specifications.
