STATEMENT OF WORK Broward Community Water Conservation and Incentives Program

1. INTRODUCTION

Water plays a critical role in South Florida, and will continue to directly influence the future sustainability of Broward County's economy, environment, and quality of life. Future water demands will continue to be influenced by population growth, rates of per capita consumption, and variable climatologic conditions.

In 2007, the Regional Water Availability (RWA) Rule was adopted by the South Florida Water Management District to ensure the preservation of regional water resources in support of Everglades restoration. The RWA Rule limits future withdrawals from the Biscayne Aquifer, currently our primary source of drinking water, thereby requiring the development of alternative water supplies to meet growing urban demands for water. Although a number of alternative water supply projects are under development and regional strategies are being explored, water conservation has been repeatedly identified as a strategy warranting aggressive implementation.

In May 2008, the Broward Water Resources Task Force ("Task Force") was created to identify and evaluate potential regional and sub-regional water supply projects and water conservation opportunities. The Task Force recognized that the water conservation offers the lowest cost means of generating the additional water needed to meet the region's projected water demands. In June 2010, the Task Force completed its report and included several recommendations for immediate implementation pertaining to regional water conservation efforts. A key recommendation advanced by the Task Force and supported by resolution of the Broward County Board of County Commissioners and the Broward League of Cities is the establishment of a county-wide water conservation and incentives program with the purpose of delivering unified water conservation messaging, information, and services to benefit all Broward county residents and water suppliers.

In response, in 2011, Broward County and 18 municipal water utilities Partnered to form the Broward Water Partnership, with water utilities committing resources to fund a regional rebate and incentives program as well as the centralized administration of the program by Broward County's Environmental Planning and Community Resilience Division, and Broward County committing funds for consultant services to aid in program branding, marketing, outreach and implementation. This program was subsequently branded Conservation Pays.

The overall objective of the Conservation Pays Program (the “Program”) is to encourage residents and businesses in Broward County to adopt an enduring water conservation ethic that support long-term water resource sustainability and to achieve permanent and measurable water savings through replacement of low efficiency plumbing fixtures with high efficiency models.

There are two principal components to the Program:

- Implementation of an aggressive media campaign to promote the overall need for water conservation, provide residents and businesses with information on ways to reduce their water consumption, and promote the availability of program resources.
- Provision of incentives for retrofitting existing fixtures with new, high efficiency plumbing fixtures through offers of free water- saving fixtures and rebates.

2. PROGRAM DESCRIPTION

The Conservation Pays Program is a coordinated county-wide program, with uniform branding that distinguishes this collaborative Partnership. Year-round messaging promotes water conservation and is heightened during dry months and periods of water shortage. Promotion and coordination of rebates and incentives is coordinated by the County, with an annual goal of distributing 2,000 toilet rebates, along with production of promotional materials, articles, a recognition program, and community outreach.

The proposed scope of work builds upon achievements already realized through implementation of the Conservation Pays program during its initial five-year period. The scope of work for services in Article 3, below, details the program elements, obligations, and commitments of the both parties (County and Partners) in the delivery of the water conservation and incentives program within Partner jurisdictions in Broward County. This scope of work covers five years of full program implementation.

The County proposes to provide these services to achieve water conservation, cost savings, and greater environmental stewardship within residences and businesses throughout the County. This effort consists of both a technical approach, designed to replace water fixtures with higher efficiency models and reduce demand throughout residences and business operations, thereby resulting in documented water and cost savings, and supporting energy conservation; and, an education and outreach approach, aimed at championing the overall need to conserve water. The overall effort will be coordinated by the County, while individual Partner participation will be required for complete program implementation.

3. SCOPE OF WORK

The Scope of Work in support of the Partnership Agreement is undertaken through the following series of tasks.

COUNTY RESPONSIBILITIES:

Task 1 Administration of the Program. The County will provide overall administration of the Agreement, including financial and annual reporting.

The County will coordinate at least one meeting annually with Partners to present annual Program achievements, review administrative or logistical Program issues, and consider new Program promotions and opportunities for improvement.

The County will provide reports to Partners as requested on rebate expenditures, device deliveries, and water savings.

An Annual Report will outline the performance of the program and the meeting of goals and objectives will include a comparison of planned vs. implemented measures, communications tools, marketing effort (including media buys), an analysis of marketing efforts relative to rebate activities, report on leveraged funds, summary of Program awards, identification of Program needs, opportunities, and recommendations. The report will also address any unanticipated delays and issues that necessitate modification of the Program. The County shall provide the Annual Report within one month following the completion of the County's fiscal year.

Task 2 Procurement and management of professional services to assist with Program development and implementation. The County will procure consulting services to assist in the overall development and implementation of an annual media and outreach campaign to get the water conservation message out, promote the Program, and connect conservation needs to climate change pressures on our water resources. For cost-effectiveness, the campaign will be designed to integrate as much as possible with existing regional outreach initiatives and media sources. The consultant, under direction of the County, will work with Partners to complete the following tasks, including, but not limited to: develop Program branding, create a Program website, develop Public Service Announcements ("PSAs") for broadcast media, prepare newsprint advertisements, arrange media buys, develop promotional articles, produce PSAs for viewing on public access channels and the County's video-on-demand service, design print materials, and develop promotional concepts.

Task 3 **Manage and promote media campaign for water conservation outreach and Program marketing.** The County will develop and promote an annual media campaign designed to impart water conservation messages to residents (brochures, website, etc.); identify opportunities to distribute water-saving information and Program promotional materials to communities, businesses, schools and other venues of interest; develop and deliver educational materials on the need to conserve water and ways to save water to residents through various media. Residents, employees, businesses, homeowner associations and other organizations that include utility customers are targeted audiences. Categories of media to be considered in the promotion of the Program include pieces for written publications (newspapers, trade publications, newsletters, brochures), broadcast media (television, radio, automated phone lines), social media, and mobile device compatible websites. Promotion of the water conservation and incentives initiative will also occur through interaction with consumer groups, the plumbing industry, and fixture vendors. Opportunities to highlight results and publicize successes will be identified by the County.

Task 4 **Communications coordination.** The County will work with Partners to ensure linking of resources and communications among the network of Partners. A database will be created that identifies Partners, Program services, and educational resources. Program materials (brochures, fliers, posters) will be provided in electronic form for reproduction by Partners. A detailed list of preferred educational resources will be generated and posted on the main Program website (to be hosted by County) with all information to be coordinated and cross-posted.

Task 5 **Rebate and incentives program.** The County will coordinate with vendors to promote the program and eligible devices; manage and process rebates; coordinate the purchase of conservation devices for exchange and giveaway; coordinate with Partners to identify appropriate points of distribution; promote both residential and commercial opportunities; provide for full accounting/tracking; and, provide additional outreach/promotion where demand may be less than availability.

The County will work with residents to guide them through the incentives process; work with regional vendors to ensure the availability of the desired retrofit fixtures and establish agreements for bulk purchasing; establish working relationships with the plumbing industry and fixture vendors; receive and evaluate resident applications for eligibility for replacement and rebates; manage the acquisition and distribution of fixtures to be provided to residents free of charge; manage the collection and disposal of replaced fixtures; manage the preparation and issuance of rebate checks; collect and analyze resident survey data; and evaluate the success of the incentives initiative.

Task 6 **Development of an awards/recognition program.** The County will coordinate with Partners to develop an awards/recognition program that quantifies and promotes water savings achieved in homes and businesses where new water conservation devices are installed.

Task 7 **Leverage funds and resources.** The County will seek to leverage dollars and resources by pursuing additional funds and support from local, state, and national sources, including, but not limited to SFWMD's Local Cooperative Funding Program, Water Sense Partnership (EPA), and local groups. In addition, the County will solicit support from sponsors through the County's Advantage Marketing program.

PARTNER(S) RESPONSIBILITIES

Task 8 **Participate in coordination meetings.** The Partner will participate in coordination meetings and provide timely review and feedback on any Program products or deliverables. The Partner will identify a designated point of Partner contact. The Partner will assist in refining Program elements and expenditure priorities, as needed; develop controls and measures of success for the Program; and, provide final oversight of Program operations within the Partner's jurisdiction.

Task 9 **Promotion.** The Partner will work with the County to identify points of distribution and promotional outlets available to Partner to promote the Program and services within the Partner's jurisdiction, and will actively coordinate with County on program promotions utilizing municipal media outlets and communications.

4. PAYMENT AND DELIVERABLES SCHEDULE

Payments for services provided by the County will be provided by the Partner according to the annual cost schedule (Exhibit B). Participating entities will not front the cost of individual rebates and/or devices, but will be invoiced by the County for actual rebates and/or devices issued within their service areas within a given year.

This Agreement includes a 5-year term for Program delivery.

Exhibit B- Cost Schedule
