I find it very interesting that with all the problems in this City the Commission wants to look into Climate change. The Federal Government has withdrawn the country from this Paris Climate Accord. Why is this a priority for this City? Why don't you concentrate on Budget, Traffic and Corruption First. Instead of the unproven theory of changing climate somewhere over the rainbow many years from now. For decades I have heard of this climate change coming. It hasn't arrived yet ! Taking a study and coming up with suggestions on changing living in

Hallandale would only increase expenditures from those of us on fixed incomes. Or you can look at the over development of approved buildings that will add many new residents to the City. That congestion might raise the temperature here in Hallandale. How come it is only the preachers with this message that make money on these ideas ? While the people they preach this unproven Climate Change to pay the bill ! Fix This City ! Mother Nature will take care of the Climate.
