All documents released in connection with this solicitation, including all appendixes and addenda, whether included herein or released under separate cover, comprise the solicitation, and are complementary to one another and together establish the complete terms, conditions and obligations of the Proposers and, subsequently, the successful Proposer(s) (the "contractor[s]") if this RFP results in an award.

Any prospective Proposer who has received this RFP by any means other than through **PublicPurchase** must register immediately with **PublicPurchase** to assure it receives any addendum issued to this RFP. **Failure to receive an addendum may result in disqualification of proposal submitted.**

### **2. PURPOSE.**

The City of Miami Beach Parking Department ("Parking") is dedicated to providing environmentally friendly service programs, including hybrid vehicle parking incentives, bicycle sharing, and car sharing, and it intends to increase the number of electric vehicle charging stations at municipal parking facilities to implement a citywide program.

In the United States, San Francisco, Sacramento, Austin, Detroit, Los Angeles, New York, Orlando, Redmond, and Washington, D.C. have established self-service electric vehicle charging station programs in their facilities.

The City's goals and objectives are to promote a vision to make electric vehicles a part of daily life for Miami Beach residents and visitors. This program is to be accessible to the maximum number of people in the most cost-efficient manner to promote electric vehicle use and conversely decrease local motor vehicle use.

Self-service electric vehicle charging stations facilitate the use of electric vehicles (EVs) due to the limited range of current EVs and their need to recharge periodically. The availability of strategically placed charging stations throughout the City provides a greater convenience and further promotes the use EVs. Benefits to the City include improved air quality, quieter and more livable streets, and decreased dependency on fossil fuels.

The availability of strategically placed charging stations throughout the City provides a greater convenience and further promotes the use EVs. Benefits to the City include improved air quality, quieter and more livable streets, and decreased dependency on fossil fuels. It is anticipated that the program would also be integrated with other alternative modes of transportation, such as transit/park and ride and car-sharing programs. The various travel modes will also be coordinated with the City's various parking facilities.

Firms that provide electric vehicle charging stations should propose a business model that is advantageous to both users and the City. In return, the firm may: use municipal parking spaces to provide their services; assess a fee for the use of electric vehicle charging stations; and revenue share with the City.

It is anticipated that the program would also be integrated with other alternative modes of transportation, such as transit/park and ride and car-sharing programs. The various travel modes will also be coordinated with the City's various parking facilities.

The contractor shall be responsible for obtaining and paying for all licenses, permits and inspection fees required for this project; and shall comply with all laws, ordinances, regulations and building code requirements applicable to the work contemplated herein related to the installation and proper functioning of the charging stations. Damages, penalties and or fines imposed on the City or the contractor for failure to obtain required licenses, permits or fines shall be borne by the contractor.
