SHORT TITLE:

A RESOLUTION OF THE MAYOR AND CITY COMMISSION OF THE CITY OF HALLANDALE BEACH, FLORIDA, AUTHORIZING UTILIZATION OF SOURCEWELL CONTRACT # 032824-RTG TO PURCHASE A SEWER CRANE TRUCK FROM RUSH TRUCK CENTERS OF FLORIDA, INC. FOR A NOT TO EXCEED AMOUNT NOT TO EXCEED AMOUNT OF ONE HUNDRED, EIGHTY-NINE THOUSAND, FOUR HUNDRED AND FIFTY DOLLARS (\$189,450); AND PROVIDING AN EFFECTIVE DATE.

STAFF SUMMARY:

Summary:

The purpose of this item is to request City Commission approval of the attached resolution authorizing the purchase of a sewer crane truck (replacing Unit 1224) for the Department of Public Works from Rush Truck Centers of Florida, Inc. The purchase will be made utilizing Sourcewell contract # 032824-RTG, in an amount not to exceed \$189,450 and to execute all related documents to effectuate the purchase.

Background:

The Fleet Department has implemented a replacement plan that balances the cost of ownership with the operability of fleet assets, considering factors such as age, utilization, and anticipated surplus value on the secondary market. Based on this analysis, the vehicle requested for replacement has been approved for FY26.

Current Situation:

The vehicle being replaced, Unit 1224, is a 2016 Ford F350 with a utility body and auxiliary crane. This truck is specially outfitted to support sewer department personnel in maintaining, repairing, and servicing sewer lift station pumps and related infrastructure. It carries the tools, equipment, and materials necessary to safely access lift stations, remove and reinstall pumps, perform mechanical and electrical repairs, and address system malfunctions in the field.

Staff seeks to utilize the agreement between Sourcewell and Rush Truck Centers of Texas, L.P. (Class 4-8 Chassis and Cabs with Related Equipment, Accessories, and Services) #032824-RTG. The initial term of the Sourcewell contract runs from July 16, 2024, through July 9, 2028. Rush Truck Centers of Texas L.P. uses its local subsidiary Rush Truck Centers of Florida, Inc to conduct business in Florida. Sourcewell, a municipal contracting agency, allows government entities to cooperatively procure equipment and services at discounted rates. By leveraging Sourcewell's cooperative pricing, the City ensures competitive costs and streamlined procurement, enabling staff to respond quickly and effectively to emerging needs.

Why Action is Necessary:

Pursuant to Code of Ordinances, in accordance with Procurement Code Section 23-5 Competitive procurement required: Procurement Mechanisms, (3) Cooperative Purchasing. Includes a variety of arrangements whereby two or more public entities have the opportunity to purchase from the same supplier or multiple suppliers using a single competitive procurement mechanism. Furthermore, Section 23-9, Award, (e) The City Manager may award procurements within the delegated spending authority. All other procurements, except emergency procurements, require commission approval for award.

Cost Benefit:

The City of Hallandale Beach routinely leverages cooperative purchasing agreements to maximize cost efficiencies and realize savings that would otherwise be difficult for a

municipality of our size to obtain independently. In alignment with this strategy, the City has elected to purchase a replacement sewer crane truck from Rush Truck Centers of Florida, Inc utilizing Sourcewell cooperative contract # 032824-RTG. This approach ensures competitive pricing, streamlined procurement, and supports the timely acquisition of this essential asset.

Replacing vehicles on a timely, lifecycle-based schedule provides both operational and financial benefits by minimizing total cost of ownership rather than simply delaying capital expenditures. As assets age, maintenance and repair costs increase nonlinearly, downtime becomes more frequent, and reliability declines—leading to reduced productivity, service disruptions, and higher indirect labor costs. Newer vehicles also offer improved fuel efficiency, lower emissions, and enhanced safety features, which can reduce liability exposure and align with sustainability goals. From a cost-benefit perspective, while deferring replacement may appear to generate short-term savings, it often results in higher cumulative costs due to escalating repairs, emergency replacements, and inefficiencies. A structured replacement program allows the City to better forecast capital needs, take advantage of warranties and favorable procurement cycles, and optimize resale or salvage value, ultimately delivering a more predictable and cost-effective fleet management strategy.

PROPOSED ACTION:

The City Commission considers the attached Resolution.
