ARTICLE 8 **MISCELLANEOUS**

8.1 RIGHTS IN DOCUMENTS AND WORK

Any and all reports, photographs, surveys, and other data and documents provided or created in connection with this Agreement are and shall remain the property of CITY; and, if a copyright is claimed, CONTRACTOR grants to CITY a non-exclusive license to use the copyrighted item(s) indefinitely, to prepare derivative works, and to make and distribute copies to the public. CITY shall have the right to audit the books, records, and accounts of CONTRACTOR and its subcontractors that are related to this Project. CONTRACTOR and its subcontractors shall keep such books, records, and accounts as may be necessary in order to record complete and correct entries related to the Project. All books, records, and accounts of CONTRACTOR and its subcontractors shall be kept in written form, or in a form capable of conversion into written form within a reasonable time, and upon request to do so, CONTRACTOR or its subcontractor, as applicable, shall make same available at no cost to CITY in written form.

CONTRACTOR and its subcontractors shall preserve and make available, at reasonable times for examination and audit by CITY, all financial records, supporting documents, statistical records, and any other documents pertinent to this Agreement for the required retention period of the Florida Public Records Act, Chapter 119, Florida Statutes, as may be amended from time to time, if applicable, or, if the Florida Public Records Act is not applicable, for a minimum period of five (5) years after termination of this Agreement. If any audit has been initiated and audit findings have not been resolved at the end of the retention period or five (5) years, whichever is longer, the books, records, and accounts shall be retained until resolution of the audit findings. If the Florida Public Records Act is determined by CITY to be applicable to CONTRACTOR's and its subcontractors' records, CONTRACTOR and its subcontractors shall comply with all requirements thereof; however, no confidentiality or non-disclosure requirement of either federal or state law shall be violated by CONTRACTOR or its subcontractors. Any incomplete or incorrect entry in such books, records, and accounts shall be a basis for CITY's disallowance and recovery of any payment upon such entry.

CONTRACTOR shall, by written contract, require its subcontractors to agree to the requirements and obligations of this Section.

Violation of this section shall result in termination of this Agreement and recovery of all monies paid by CITY pursuant to this Agreement, and may result in debarment from CITY's competitive procurement activities.

In addition to the foregoing, CONTRACTOR further represents that there has been no determination, based on an audit, that it committed an act defined by Section 287.133, Florida Statutes, as a "public entity crime" and that it has not been formally charged with committing an act defined as a "public entity crime" regardless of the amount of money involved or whether CONTRACTOR has been placed on the convicted vendor list.

8.4 **INDEPENDENT CONTRACTOR**

CONTRACTOR is an independent CONTRACTOR under this Agreement. In providing the services, neither CONTRACTOR nor its agents shall act as officers, employees, or agents of CITY. No partnership, joint venture, or other joint relationship is created hereby. This Statement of Work (SOW) describes the high-level deliverables and conditions for the SenBos Integration MVP (Minimum Viable Product) Pilot for the City of Hallandale Beach.

The purpose of this SOW is to identify and outline the software and related services to evaluate the effectiveness of this integration.

This SOW defines the scope of work for the integration of SenSen (SenBos) with Gtechna's PlateSentry solution, including system configuration, data integration, and validation of enforcement workflows using fixed License Plate Recognition (LPR) technology.

The proposed services to City include all tasks related to the implementation of the SenBos and PlateSentry integration MVP pilot. This pilot is designed to be delivered over a short timeline and will follow a series of high-level steps focused on validating the integration, system performance, and enforcement workflows. The project will be delivered in phases, depending on operational readiness and pilot requirements defined by the City of Hallandale Beach.

The main project steps in order of execution are as follow:

1. Planning and Alignment Phase

Gtechna will collaborate with the City and SenSen teams to confirm pilot objectives, locations, and operational requirements. This includes defining integration scope, parking rules, enforcement expectations, and success criteria for the MVP.

2. SOW Finalization

This Agreement, inclusive of this Exh. A Statement of Work (SOW), confirms the agreed scope, responsibilities, and deliverables for the MVP pilot. It ensures alignment between all parties and establishes a clear framework for execution.

3. Integration Setup

Gtechna will configure the integration between SenBos and PlateSentry, including API connectivity and data mapping. This step ensures that LPR events captured by SenSen hardware are transmitted and processed correctly within the PlateSentry system.

4. Environment Configuration

A dedicated PlateSentry test environment will be configured for the City of Hallandale Beach. This environment will be used to receive LPR events, apply enforcement logic, and validate system behavior during the pilot.

5. Hardware Installation

ISS and the City, in coordination with SenSen, will install and configure Edge hardware and cameras at designated entry and exit points. Connectivity to SenBos will be validated to ensure proper data transmission. ISS will be responsible for installing edge server at the defined location.

6. System Validation and Testing

End-to-end testing will be performed to validate LPR event capture and transmission, data ingestion into PlateSentry, entry and exit matching, and enforcement logic including paid sessions and grace period handling.

7. Enforcement Workflow Validation

The system will generate enforcement outcomes such as alerts and Ticket-by-Mail (TBM) candidates. Success criteria will be evaluated based on:

- Accuracy of event-to-vehicle/session matching
- Consistency of enforcement outcomes across different conditions
- Timeliness of event availability for review and enforcement
- Reliability of event transmission from AI-EDGE to the system
- Quality of images and evidence supporting enforcement decisions
- Stability of the workflow during continuous operation
- Alignment with existing review processes (e.g., Command Center)

8. Pilot Execution

The MVP pilot will run for a defined period of approximately 90 days, during which system performance, accuracy, and operational impact will be monitored.

9. Performance Evaluation

Gtechna, SenSen, and the City will evaluate the pilot based on plate recognition accuracy, event matching accuracy, system latency, and enforcement effectiveness.

10. Pilot Completion and Next Steps

At the conclusion of the pilot, a summary of findings and recommendations will be provided to City. Based on the results, the city may decide to proceed with further enhancements, extend the pilot program for an additional sixty (60) days or commence with a full production rollout.

11. Summary

SENSEN AI-Edge servers are high-performance edge computing devices designed to process License Plate Recognition (LPR) data directly at the camera level rather than relying solely on centralized cloud processing. By performing real-time AI analytics at the edge, these servers significantly reduce latency, improve capture accuracy, and enable faster, more reliable plate recognition. The AI-Edge servers enhance overall LPR performance by filtering false reads, improving vehicle detection in challenging lighting or weather conditions, and maintaining consistent performance during high-traffic periods. Additionally, edge-based processing reduces network bandwidth usage and minimizes system downtime, resulting in fewer orphaned plate reads on entry and exit and a more accurate, efficient, and resilient parking enforcement and access-control operation. The system also continues to operate if internet connectivity fails, with all data securely stored locally on the AI-Edge server until the connection is fully restored, ensuring no loss of critical LPR data.

Out Of Scope:

- Installation of AI-EDGE server units at each designated location

12. Cost Schedule

Subject to mutual agreement following the pilot period, the following cost schedule outlines the estimated expenses associated with the AI-EDGE pilot over a three-year period. It includes annual subscription fees and one-time professional services required for implementation and configuration. Subscription costs reflect ongoing access to the platform, system updates, and support, with a projected increase over time. Professional services are applied in the first year to cover initial setup, integration, and deployment activities and are only due if the City elects to proceed with a full rollout at the conclusion of the pilot. This structure ensures a predictable cost model while supporting long-term system performance and scalability.

Yearly cost breakdown	1st Year	2nd Year	3rd Year	Total
Subscriptions	\$ 18,450.00	\$ 21,012.50	\$ 21,537.83	\$ 61,000.33
Professional Services	\$ 11,749.00			\$ 11,749.00
Subtotal	\$ 30,199.00	\$ 21,012.50	\$ 21,537.83	\$ 72,749.33
Total including taxes	\$ 30,199.00	\$ 21,012.50	\$ 21,537.83	\$ 72,749.33
